

Prepare to Perform Update What should you be doing now?

Issue 5 January 2020

"You can't cross the sea merely by standing and staring at the water"

Welcome to issue four of the Prepare to Perform Newsletter supporting Year 11 students prepare for their GCSE exams.

January Message from Mr Bateman

'Happy New Year!' I am sure, like me, a lot of you will wonder how we have got 20 years into this century already! For our students in year 11 this is going to be a key year in their lives they look back on, finishing school, starting apprenticeships and colleges and making those first steps into the adult world. For many students this will be an exciting year, however, at this stage it can for some feel overwhelming. It's important that we continue to work together to support students at this time so please do contact myself or your child's tutor should you have any concerns with your son or daughter balancing all the demands on them. I know the Practise Exams have thrown up a number of emotions, mostly positive I hope, but I certainly hope they have served their designed purpose to show where all students are achieving, as well as where they need to apply themselves more. I was pleased to meet with a number of students and parents in the aftermath of practice results day and really hope students are feeling a lot happier about what needs to be done as we move closer to the summer exams. As a school, we will continue to support and nurture your child, both academically and emotionally and look forward to your continued support in what is a very busy, but exciting time in the lives of all Year 11 students. Mix up your revision!

Mix up their revision after the Practice Exams. Try some of these with them!

Flash Cards

Write a question on one side of the card and an answer on the back. Show someone the question - can they get the answer?

With your son or daughter, how many can you get right in two minutes?

Tweet Tweet!

Reflect on a topic they want to revise.

Now, think about what they would write if they had to tweet about this.

Write their tweet – try to stick to **140 characters**.

Show Me What You've Learned!

Draw and label a picture which represents what they have learned today.

Next ask them to talk through their picture and what it means to them.

Staying calm, feeling good, being effective

Top 10 tips to support your child through their exams

This month's TOP TIP 4 is in two parts to help your child control different aspects of their life to help them perform better when it comes to exam time next year.

4. Healthy Eating

- Plan your family meals for the week breakfast, snacks, lunches and evening meals
- Carry out a weekly food shop and make sure you write a list
- Avoid high sugary and fatty foods or drinks
- Aim to eat clean, fresh and healthy foods
- Have a couple or 'treat' meals / or meals out per week
- Use the Mark Lloyd recipes and meal planner as guidance
- Encourage them to eat breakfast everyday
- Hydration is key to brain functioning so make sure your child carries a bottle of water with them

4. Healthy Eating

A BALANCING ACT

Keep your sugar levels under control.

Eating the right food and drink can energise your system, improve alertness and sustain your child through the long exams

MIGHTY MAGNESIUM

Magnesium is involved in over 1000 enzymatic reactions in the body. It's vitally important in providing our cells with energy

> Green vegetables Nuts Pulses Fish Bananas

UP THE B'S & OMEGA 3'S

B vitamins are directly involved in creating energy at a cellular level & will give you an energy boost Green vegetables Asparagus / Spinach Broccoli Yoghurt Chicken / Salmon Whole Grains / Brown rice Almonds / Pecans Eggs

MEXICAN CHICKEN ENCHILADAS

Boost Brain Power with this easy to make meal (Every little helps as they say)

MEXICAN CHICKEN ENCHILADAS, CHIVE YOGHURT, BASHED AVOCADO, ROASTED TOMATOES. MAKES 2 ENCHILADAS PER PERSON.

METHOD:

Preheat oven to 180°c/Gas 4.

In a medium, non-stick frying pan over medium heat, cook chicken until no longer pink and juices run clear. Drain excess fat. Cube the chicken and return it to the pan. Add the onion, yoghurt, chives,125g Cheddar cheese, parsley, oregano and ground black pepper. Heat until cheese melts. Stir in salt, half of the chopped tomatoes, water, chilli powder, green pepper and garlic. Roll even amounts of the mixture in the tortillas. Arrange in a baking dish. Cover the rest of the tomatoes and the remaining 85g Cheddar cheese. Bake uncovered in the preheated oven for 20 minutes. Cool for 10 minutes before serving.

FOR THE AVOCADO

SMASH: Split the avocados, remove the stone and scoop out the flesh, roughly chop or smash and squeeze over the lemon juice, this adds flavour, but also stops the avocado from turning brown.

EAT THIS DISH AND YOU WILL GAIN THESE BENEFITS:

Energises you over a long period, makes you feel great, boosts memory and promotes healthy brain cells.

The best time to eat this dish: For lunch or an evening meal during peak exam period.

Reason: High in protein from the chicken and the yoghurt which will keep you full, give you energy and make you feel good. Tortillas are high in fibre and complex carbohydrates for more sustained energy and the iron content will help blood move oxygen around your body. Avocado is a superfood rich in stress relieving B vitamins, potassium and healthy fats. 4 skinless, boneless chicken breast fillets

1 onion, chopped

225ml yogurt

1 bunch of chives, cut into thin rings 125g grated Cheddar cheese

- 1 tablespoon dried parsley
- 1/2 teaspoon dried oregano
- 1/2 teaspoon ground black pepper 1/2 teaspoon salt (optional)
- 400g tomatoes, roughly chopped
 - 125ml water
 - 1 tablespoon chilli powder
 - 5 tablespoons chopped green pepper
 - 1 clove garlic, minced 8 flour tortillas
 - 85g grated Cheddar cheese
 - 2 avocados
 - Juice from ½ lemon

This dish has been specially created by celebrity chef, Mark Lloyd.

PiXL Apps for Learning are these being used in your home?

What score do they have on each of them?

English, History and Geography

Have these been downloaded by your child? Are they being used?

Click on the circles to see more

Following the year 11 practice exams, we have been able to link all of the question level analysis to the PiXL Maths App. This means that on each student's login of the PMA there will be personalised revision resources based on their areas of weakness from each of the three Maths papers. This is an excellent resource that we really need to encourage your son or daughter to fully engage with.

ESP (Extra support programme)

ESPs are in place to provide additional support your son or daughter might need in a subject. It is important they attend and ask any questions they have whilst at this sessions. They need to plan their time to ensure they can do this.

ESP Dates can be found here <u>www.gcsere.vision/p/calendar.html</u> and also on the school website calendar and also have been emailed to you

Key Dates :

WINK: Coping with exams - Wed 22nd January

Year 11 Parents Evening 2 - Wed 11th March

Easter Revision: Monday 6th - Thur 9th April

May Half Term Revision: - Tues 26th - 29th May

How to encourage productive learning

Information for parents and carers

Did you know?

Experts in nutrition stress the importance of healthy diets for ensuring the most effective working of our brains. For example, although caffeine and sugar can provide bursts of energy, consuming these can lead to significant dips in focus and energy. We also know that easy swaps can lead to more balanced nutrition and energy levels, like using wholegrains, nuts and berries. Having a tidy space can reduce stress and improve productivity. Another way to maximise opportunities for work and reduce distractions is to ensure the space is organised with everything needed for studying: laptop, books, pens and any other equipment. If you want to go a step further, plants are shown to not only create a calm space but also aid concentration.

Many people find approaches like the Pomodoro technique help to increase their levels of productivity as it allows for focused 'work' time for 25 minutes, and then a 5-minute reward break. It is often surprising how much we can actually achieve in short bursts of time when we are fully focused, with no distractions, and know that there is a clear end when we'll get to do something we want to.

What can you do?

Help your child to create a productive learning environment, a quiet space where they can work at a clear surface with as few distractions as possible. Encourage this to be a social media-free space.

Sit down with your child and offer to help them create a timetable of study. Work with them to map out the free time they could use to study and the free time that should be 'work-free' so they can do things they enjoy. Plan out the subjects and units they know they need to work on and schedule these into their 'work' slots. If your child is receptive to doing this together, it can help them to see that they aren't expected to use all of their 'free' time to study, and that taking breaks and investing time in their hobbies and friends is important and valuable for them and their wellbeing. If possible, when your child is studying, bring them some snacks and a drink to help sustain them.

Encourage your child to prepare – either by themselves or with you – recipes from our Power to Perform recipe cards to ensure that they are eating brain-boosting foods. These recipes have been designed by an expert in the field to ensure that your child has brain-boosting foods and drink at their fingertips.

How to support revisiting of learning

Information for parents and carers

Remembering information is the first step for students in mastering higher level skills. For students to be able to explain, analyse, evaluate and create, they need to have a firm knowledge of the information and terms involved first.

Ebbinghaus' forgetting curve aims to show us how information can be lost from our memories over time when we don't strive to retain it. This forgetting curve suggests that we will halve our memory of new information in just days, unless we revisit learning to gradually move it into our longterm memory.

The more frequently that information is revisited and used, the more likely it is to move into longer term memories. Research shows that revisiting learning frequently is more effective than mass-revision. Unfortunately, many students report that they don't feel like it's working and they prefer larger and rarer chunks. Knowing this is useful for us, and the young people we care about, so we can talk about it and address this issue, even showing them typical forgetting curves and sharing examples of these.

What can you do?

As early as possible, encourage your child to make notes of the key information for topics they are studying. They may highlight these in a book/on a sheet, write them down onto flash cards, create a mindmap or record them in any other way that they wish. Colour-coding these can be a helpful tool in aiding revisiting as students can identify in green what they are confident with, orange what they are unsure they would remember long term, and code in red that information they didn't know until they wrote it down or don't fully understand and may need to explore further.

Encourage revisiting of topics frequently, using a home-learning schedule. Discuss with your child the need to revisit learning as they progress through units,

move onto next ones and come to the end of a term or year. Revision shouldn't be revising all the knowledge from the entire year; we should aim to revisit learning frequently to embed it into our long-term memories and then revise the higher skills using this knowledge as we go further into the course.

Encourage your child to find ways to address 'red' areas and weaknesses. This doesn't necessarily need to be seeking a teacher's help, it might be reading about it in a textbook, online or practising a particular skill. They may wish to use some of the resources PiXL have created as part of our Independence package to help them to consider areas of weakness and different ways they can address this.
