

Project Future

April-September 2020

LEADERS/TEACHERS - *How to use this material*

Today we are releasing a package to help Year 11, 12 and 13 students to plan for their future and to give them focus during this time they have away from school.

What it is:

- A set of progression sheets which help students study some content ready for post-16 or post-18.
- A balance between academic material and a focus on helping them adjust and prepare for September
- A simple way of giving them focus and tracking what they have done without any workload on staff.

How it works:

- Students select a progression sheet that interests them and they choose tasks to complete
- There are subject specific sheets and wider skills sheets focusing on social and emotional progression
- They complete the 'Progression Log' which logs what they have learned and their own next steps
- They create a portfolio (online or in a folder) which shows some of their thinking and work

Who it's for:

- Year 11 who are about to go into post-16 courses - there are progression sheets by groups of subjects
- Year 12 who will be returning and applying for UCAS or work - the sheets will help them have something to say in their applications
- Year 13 who are going to university - the sheets help them get ready academically and emotionally.
- ANY of the sheets can be used by any year groups - the material is relevant across all of them
- Feel free to download all of the material into your own school site

We hope that your students enjoy this and that it will help them find purpose and focus in this difficult time. This is the time for them to re-direct their learning ready to start September as prepared as they can be.

We hope it's helpful,

Rachel
