Dear Parent/Guardian

Re: Mathematics Revision Guides

The Wildern School Mathematics Department are pleased to offer the opportunity for all GCSE students to purchase a discounted 'Edexcel GCSE Mathematics Revision Guide' through the school, published by Pearson.

The revision guide is written specifically for the new GCSE Mathematics course (first examination 2017). It can provide an excellent resource for revision and learning throughout Years 9, 10 and 11. It is available for both the Higher and the Foundation tier of entry and your child's Mathematics teacher will be able to advise which level should be purchased.

The cost of each revision guide is £3.00 and all money should be taken to the school Finance Office and a receipt collected. Your child can then collect their revision guide from Mr Marshall in room 321. If your child has been identified as 'Pupil Premium', they are entitled to a copy free of charge and these can also be collected from room 321.

In addition to the revision guide, the school also has a limited number of 'Practice Paper Plus' books. These are different to resources used in lessons and so some students like the opportunity to practice exam style questions in their own time. The school are offering these at £3.00 as well and they can be ordered and collected along with the revision guides.

Whilst it is not compulsory that students purchase any of the revision material, the revision guide especially is thoroughly recommended to aid their learning and revision across their GCSE studies.

Yours faithfully

K Smith
