

5

ways to...
use your child's Pathways Booklets

Pathways booklets will guide you and your child through everything you need to know for Pathways including subject information, assessment information and advice for students.

1

Talk

Have lots of conversations about pathways and the subjects students are interested in. Use the 'Making the Right Choice' section in the Booklet to help steer these conversations.

2

Contents page

Check with your child to see if they know how to use the contents page at the start of the Booklet to help them find relevant information quickly.

3

GCSE or Technical Vocational Qualifications

Both are approved qualifications. Vocational qualifications are equivalent to academic GCSEs. Find out more in the Pathways Booklet about both types of qualifications.

4

Assessment

It is worth looking at how each course is assessed. Each subject provides this information on their subject page.

5

Stay open minded

We would recommend you look at every subject available even if your child is already sure about which subjects they are taking.
