

#BEEWELL

What is BeeWell?

#BeeWell is a programme that aims to understand the issues that matter to young people through an annual wellbeing survey delivered to secondary schools. The results are anonymised and combined so that schools, voluntary agencies, local government and health can act on what young people are saying and make positive change.

In 2023, **22,000** young people in Hampshire, Isle of Wight, Portsmouth and Southampton had their voices heard through the #BeeWell Programme.

The survey

All schools in Hampshire, the Isle of Wight, Portsmouth and Southampton have been invited to participate. Students in years 9 and 10 are invited to complete the survey at school between 1 October and 29 November 2024. You have the option to opt them out, students are also able to opt themselves out at any time.

200 young people have been involved in developing the questions and cocreating the survey by telling us what factors influence their wellbeing, and what makes them thrive. It is important we get the opportunity to hear all young people's voices, so alongside the standard survey, there is a shorter version and a symbol version. The survey can be completed in multiple sittings and young people will be supported by their teachers to complete.

Schools will receive a confidential, bespoke feedback report to provide insight into the wellbeing of students. All individual surveys are anonymous, however collectively will be able to inform improvements. Neighbourhood level data will also be publicly available to help local organisations and businesses target resources to where they are most needed.
